

Case Study 1

Venous Ulcer

Patient:

78 Year Old Female

History:

18 month old venous ulcer treated with Intra Site gel, surrounding skin protected with Zinc paste

Treatment:

On 27 September 2005 Photizo® therapy was started together with the Intra Site gel covered with a Meloline pad. The Photizo® therapy was done once a day for 5 minutes.

Outcome:

On 2 October the wound was fully closed and progressing well towards full healing.

Start of Treatment

2 October 2005 – Wound fully closed and progressing well towards full healing

Another 4 days later with the Photizo® therapy alone the wound is fully healed. It took 10 days to heal this wound completely.
